

The instant solution

Reconditioned Alfa Laval separators

Reconditioned Alfa Laval separators meet the same quality and safety standards as new Alfa Laval models. An excellent value for money, they often require less maintenance than separators of other makes.

Reconditioned Alfa Laval separators are safe and reliable solutions for cleaning:

- Heavy fuel oil
- Lube oil
- Distillate
- Marine diesel oil

Do you recognize these problems?

High operating costs due to worn or inefficient oil separators

- Inefficient oil cleaning, which results in increased injector wear/seizure, line wear, higher engine maintenance costs and shorter engine lifetime
- High separator maintenance costs due to additional man-hours and spare parts
- Frequent breakdowns resulting in unplanned maintenance and costly downtime.

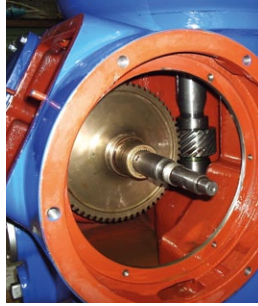

Existing fuel or lube oil separators are costly to replace with a brand new machine

- Cost cannot be justified for an older ship
- Operating budget does not allow investment in a new separator
- Delivery time is crucial

Reconditioning your separator

Completely refurbished for high performance and safety each separator is completely stripped down.

All critical parts are carefully examined and rigorously tested.

All bearings are replaced.
All worn components are replaced with high-quality new parts.
The bowl is rebalanced.

The separator is rebuilt according to the original specifications.
The unit is subjected to advanced discharge and mechanical testing.

The frame is sandblasted and repainted.
The standard configuration is 60 Hz.

Much more than just a separator

- Every reconditioned separator is covered by a full 12-month warranty
- Workshop test certificate
- Instruction manual

Options available upon request

- Selected set of tools
- EPC control unit for full automation
- Other ancillary equipment
- 50 Hz configuration

A cost-effective solution

- Up to 50% less expensive than a new separator
- No costly re-piping is necessary when a reconditioned unit of the same type replaces the existing separator

Before reconditioning.

After reconditioning.
